

New Career Success Scholarship

The New Career Success Scholarship, a need-based scholarship, is designed to make college affordable for students that may otherwise not be able to fund the cost of attending Remington College. It was also designed to achieve the following goals established when we founded Remington College: To provide an educated work force to local employers and, more importantly, to offer achievable educational opportunities to non-traditional students who are driven to seek a college education and success in a new career.

To be eligible to receive this need-based scholarship, an Applicant must:

- Have a total income as reflected on his/her Institutional Student Information Record (ISIR) that is less than or equal to the Median Family Income in Alabama. The Median Family Income is obtained from the U.S. Census Bureau's most recent published information.
- Be seeking first-time enrollment, as a new student, in an eligible program at Remington College.
- Successfully complete the New Career Success Scholarship Application and submit it to the Financial Aid Department at Remington College
